Meet Flo, a glacier, as she shows you what the life of a glacier is like in this picture book filled with fun facts, from what glaciers are and how they're formed to what creatures live there, and more. Glaciers exist on every continent on earth, growing, spreading, and shrinking over thousands of years. But what are they, and how are they formed? Glacier on the Move tells the story of a glacier named Flo and her slow-motion race to the sea, from the edge of an ice field and down steep cliffs, to muscling her way around mountains, and stretching into a valley. With the help of some iceworms in the margins, Flo reveals how glaciers move, change shape, and provide for the surrounding world and animals. Blending fascinating science facts with dynamic illustrations, Glacier on the Move introduces young readers to glacial history and science in a captivating and unique way. Madrid on the move illustrates print culture and the urban experience in nineteenth-century Spain. It provides a fresh account of modernity by looking beyond its canonical texts, artworks, and locations and explores what being modern meant to people in their daily lives. Rather than shifting the loci of modernity from Paris or

London to Madrid, this book decentres the concept and explains the modern experience as part of a more fluid, global phenomenon. Meanings of the modern were not only dictated by linguistic authorities and urban technocrats; they were discussed, lived, and constructed on a daily basis. Cultural actors and audiences displayed an acute awareness of what being modern entailed and explored the links between the local and the global, two concepts and contexts that were being conceived and perceived as inseparable. An inspiring and empowering picture book about the small things kids do that have the potential to change the world! Meet some of the world's most beloved movers, shakers, scientists, activists, dreamers, and doers from the past and present who model what every childhood first can lead to! Neil Armstrong, Misty Copeland, Ruth Bader Ginsburg, and more were once kids—they grew up to lead us to the moon, dance in the ballet, and break barriers. From first steps to solving puzzles and learning the alphabet, all the small things are only the beginning: they can lead to future activism and innovation that just might change the world! Featuring fresh and accessible text paired with vibrant illustrations, *We Move the World* gives young readers a chance to see how much is possible just because of the things they already do. Includes robust backmatter that gives further context on each figure and historical moment, including the most recent COVID-19 pandemic.

New house. Fresh start. Same husband. Can you paint over the cracks in a marriage? 'Felicity has the reader gripped when she explores unhealthy relationships based on insecurity and delusion. She writes with a raw realism' Adele Parks, Sunday Times No.1 bestselling author, in *Platinum* Meet the new neighbours. Whose side are you on? 'An exciting, dark novel about friendship; brutally truthful and raw' Adele Parks, Sunday Times No. 1 bestselling author This work brings together a collection of essays and articles by Edmond Y. Azadian, written on a range of Armenian issues since the end of World War II. Azadian, a journalist and commentator on Armenian international issues, is an important figure in the Armenian national consciousness. Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! When eight-and-a-half-year-old Mallory McDonald's parents tell her that they are moving, she's mad—really mad! It's not fair! How can they make her move away from Mary Ann, her best friend in the whole wide world? Who will she paint her toenails with, tell secrets to, and make scrapbooks with? When Mallory arrives at her new house on Wish Pond Road, things are terrible. Her room is too small and the girl next door is mean.

But Joey lives next door, too. Even though he doesn't paint his toes, he tells jokes, helps teach her cat to do tricks, and shows her how to skateboard. Mallory's having so much fun she forgets the pact she made with Mary Ann never to make friends with a boy next door. But, when Mary Ann comes to visit, what will Mallory do? Will she have to choose between her best friend and her new friend? This book constitutes the joint refereed proceedings of six international workshops held as part of OTM 2003 in Catania, Sicily, Italy, in November 2003. The 80 revised full workshop papers presented together with various abstracts and summaries were carefully reviewed and selected from a total of 170 submissions. In accordance with the workshops, the papers are organized in topical main sections on industrial issues, human computer interface for the semantic Web and Web applications, Java technologies for real-time and embedded systems, regulatory ontologies and the modelling of complaint regulations, metadata for security, and reliable and secure middleware. Where will you live in 2030? Where will your children settle in 2040? What will the map of humanity look like in 2050? In the 60,000 years since people began colonising the continents, a recurring feature of human civilisation has been mobility - the constant search for resources and stability. Seismic global events - wars and genocides, revolutions and pandemics - have only accelerated the process. The map of humanity isn't settled, not now, not ever. As climate change tips toward full-blown crisis, economies collapse, governments destabilise and technology disrupts, we're entering a new age of mass migrations - one that will scatter both the dispossessed and the well-off. Which areas will people abandon and where will they resettle? Which countries will accept or reject them? As today's world population, which includes four billion restless youth, votes with their feet, what map of human geography will emerge? Here global strategy advisor Parag Khanna provides an illuminating and authoritative vision of the next phase of human civilisation - one that is both mobile and sustainable. As the book explores, in the years ahead people will move to where the resources are and technologies will flow to the people who need them, returning us to our nomadic roots while building more secure habitats. Move is a fascinating look at the deep trends that are shaping the most likely scenarios for the future. Most importantly, it guides each of us as we determine our optimal location on humanity's ever-changing map. Imagine handing over your passport in Saudi Arabia, being sent away with the 'women and children' in an evacuated from Congo, catching a ride on the back of a stranger's motorcycle in China, getting closer than you ever

thought with your Italian mother-in-law, learning Arabic in a Syrian mosque, finding yourself at a dinner party with your husband's colleague and his multiple wives, or using your second language to teach another grown woman to use a tampon. Life abroad is an adventure. It can be both exhilarating and terrifying, and sometimes there seems to be no middle ground. One thing is for sure, living in a country other than your own is anything but ordinary! These pages are filled with stories from women who have shared the highs and lows of living abroad. The feelings are strong and real on these pages; covering love, loss, friendship and lessons learned across the continents. How can we prepare our children, ourselves and our staff for a move overseas? What is involved? How do we keep in touch with our parent culture? This text shares the knowledge of missionaries and diplomats for raising families overseas. Music is a mobile art. When people move to faraway places, whether by choice or by force, they bring their music along. Music creates a meaningful point of contact for individuals and for groups; it can encourage curiosity and foster understanding; and it can preserve a sense of identity and comfort in an unfamiliar or hostile environment. As music crosses cultural, linguistic, and political boundaries, it continually changes. While human mobility and mediation have always shaped music-making, our current era of digital connectedness introduces new creative opportunities and inspiration even as it extends concerns about issues such as copyright infringement and cultural appropriation. With its innovative multimodal approach, *Music on the Move* invites readers to listen and engage with many different types of music as they read. The text introduces a variety of concepts related to music's travels—with or without its makers—including colonialism, migration, diaspora, mediation, propaganda, copyright, and hybridity. The case studies represent a variety of musical genres and styles, Western and non-Western, concert music, traditional music, and popular music. Highly accessible, jargon-free, and media-rich, *Music on the Move* is suitable for students as well as general-interest readers. The *Medicine on the Move* series provides fully flexible access to subjects across the curriculum in a unique combination of print and mobile formats ideal for the busy medical student and junior doctor. No matter what your learning style, whether you are studying a subject for the first time or revisiting it during exam preparation, *Medicine on the Move* will give you the support you need. This innovative print and app package will help you to connect with the topics of orthopaedics and rheumatology, to learn, understand, and enjoy them, and to cement your

knowledge in preparation for exams and future clinical practice. By using this resource in print or as an app, you really will experience the opportunity to learn medicine on the move. Former Children's Laureates Michael Rosen and Sir Quentin Blake join forces for a personal and uniquely affecting collection of poems about migration. "What you leave behind Won't leave your mind. But home is where you find it. Home is where you find it." Michael Rosen and Sir Quentin Blake join forces for a landmark new collection, focusing on migration and displacement. Michael's poems are divided into four: in the first series, he draws on his childhood as part of a first-generation Polish family living in London; in the second, on his perception of the War as a young boy; in the third, on his "missing" relatives and the Holocaust; and in the fourth, and final, on global experiences of migration. By turns charming, shocking and heart-breaking, this is an anthology with a story to tell and a powerful point to make: "You can only do something now." An eye-opening journey into the power of human movement and how we can harness it to optimize our brain health, boost our mood and improve every aspect our lives For our earliest ancestors who hunted and gathered, movement meant survival. Our brains evolved to reward physical activity. Moving, thinking and feeling have always been inextricably linked. Yet what happens when we stop moving? Today, on average, we spend around 70% of our lives sitting or lying completely still. Our sedentary lifestyle—desk jobs, long commutes and lots of screen time—is not only bad for our bodies. It can also result in anxiety, depression and a lower overall IQ. But there's good news. Even the simplest movements can reactivate our bodies and open up a hotline to our minds, improving our overall well-being and longevity. And we don't have to spend countless hours in the gym. In fact, exercise as we understand it misses the point. Veteran science journalist Caroline Williams explores the cutting-edge research behind brain health and physical activity, interviewing scientists from around the world to completely reframe our relationship to movement. Along the way she reveals easy tricks that we could all use to improve our memory, maximize our creativity, strengthen our emotional literacy and more. A welcome counterpoint to the current mindfulness craze, Move offers a more stimulating and productive way of freeing our caged minds to live our best life. Physician and writer Oliver Sacks recounts his experiences as a young neurologist; his physical passions--weight lifting and swimming; his love affairs, both romantic and intellectual; his guilt over leaving his family to come to America; his bond with his schizophrenic brother; and the writers and

scientists--Thom Gunn, A.R. Luria, W.H. Auden, Gerald M. Edelman, Francis Crick--who influenced him. Language is always changing, but the way English is spoken today rubs many of us the wrong way. Whether it's the use of literally to mean "figuratively," or the way young people use LOL or business jargon like What's the ask?—it often seems as if the language is deteriorating before our eyes. But the truth is different and a lot less scary. Drawing examples from everyday life and employing a generous helping of humor, John McWhorter shows that these shifts are common to all languages, and that we should embrace these changes, not condemn them. He opens our eyes to the surprising backstories to words and expressions we use every day. Did you know that silly once meant "blessed"? Or that ought was the original past tense of owe? Or that the suffix -ly in adverbs is actually a remnant of the word like? In *Words on the Move*, McWhorter encourages us to marvel at the dynamism and resilience of the English language, and his book offers a delightful journey where we see that words are ever on the move and our lives are all the richer for it. Slide the tabs to see the little bug move and grow! A curious little bug is on the move, and young children can help! Slide the tabs so the little bug can climb a hill, run through a forest, spin on a flower, and more. * Interactive moveable parts on the cover and also every spread * Cheery and colorful illustrations and fun read-aloud text * And a surprise pop-up ending! Perfect for growing minds, *Little Bug on the Move* is innovative and interactive fun for young babies and toddlers everywhere. * Great family read-aloud book * Interactive books for babies and toddlers * Gifts for 0-3 years old

In this book, Rebecca Lorimer Leonard shows how multilingual migrant women both succeed and struggle in their writing contexts. Based on a qualitative study of everyday multilingual writers in the United States, she shows how migrants' literacies are revalued because they move with writers among their different languages and around the world. *Writing on the Move* builds a theory of literate valuation, in which socioeconomic values shape how multilingual migrant writers do or do not move forward in their lives. The book details the complicated reality of multilingual literacy, which is lived at the nexus of prejudice, prestige, and power. For use in schools and libraries only. Tom, Anne, and Gordon learn about shape and measurement when they try to find the right spot for their chicken pen. A comprehensive, upbeat guide to help you survive the moving process from start to finish, filled with fresh strategies and checklists for timing and supplies, choosing which items to toss and which to keep, determining the best place to live, saying farewell and

looking forward to hello. Moving is a major life change—time consuming, expensive, often overwhelming, and sometimes scary. But it doesn't have to be! Instead of looking at it as a burdensome chore, consider it a new adventure. Ali Wenzke and her husband moved ten times in eleven years, living in seven states across the U.S. She created her popular blog, *The Art of Happy Moving*, to help others build a happier life before, during, and after a move. Infused with her infectious optimistic spirit, *The Art of Happy Moving* builds on her blog, offering step-by-step guidance, much-needed comfort, practical information, and welcome advice on every step of the process, including: How to stage your home for prospective buyers How to choose your next neighborhood How to discard your belongings and organize your packing How to say goodbye to your friends How to make the transition easier for your kids How to decorate your new home How to build a new community And so much more. Ali shares invaluable personal anecdotes from her many moves, and packs each chapter with a wealth of information and ingenious tips (Did you know that if you have an extra-large welcome mat at the entrance of your home, it's more likely to sell?). Ali also includes checklists for packing and staging, and agendas for the big moving day. Whether you're a relocating professional, newly married, a family with kids and pets, or a retiree looking to downsize, *The Art of Happy Moving* will help you discover ways to help make your transition an easier one—and be even happier than you were before.

"Exercise changes the brain. But which exercises have what effect? Time to get up to speed with the cutting-edge science of the mind-body connection and discover how just a little bit of movement could shift your own head to a better place"--Publisher's description. Polly the train driver needs to take passengers into town, Sarah the builder needs to dig a deep hole and Mo the vet needs to take a horse back to the farm. Can you help everyone do their work today by picking the right vehicle for each job? When you've found all the right vehicles, choose your favorite and pick the job you would like to do! Pre-schoolers can lift the flaps, match vehicles to jobs, explore busy scenes and learn key first words in this interactive board book series. With 16 colorful, sturdy flaps to lift, perfect for little hands, the *Busy Little World* board book series uses an inventive combination of interactive play, story and learning. Also available: help the emergency teams save the day in *On the Move: Rescue*

In 2007 the IS wo- shop (Information Security) was added to try covering also the speci?c issues of security in complex Internet-based information systems. Get up off the sofa and start moving with former Blue Peter presenter Radzi

Chinyanganya, in his first children's ebook. Learn to walk like a crab, swing like a monkey, and slide like a penguin in this ebook from the Winter Olympics presenter that helps children have fun and get active, all the while learning about favourite animals. Simple moves are modelled on the natural movements of the animals and can be easily integrated into the day, with an exercise to do when you wake up, suggestions for ones to do during the day, and a relaxing exercise to help children settle down for bedtime. Radzi wants every kid to enjoy the amazing way exercise can make you feel. Illustrations by Francesca Rosa accompany the exercises, showing young readers exactly what they need to do for each one. Ideal for both active kids and children who are a bit more reluctant to go out and play, this exciting new ebook teaches them about the natural world as they have fun moving their bodies. It rumbles through the city and the countryside. It travels on a track. This train is on the move! What kinds of things do trains carry? And who controls trains? Read this book to find out! Learn all about mighty machines in the Vroom-Vroom series—part of the Lightning Bolt Books™ collection. With high-energy designs, exciting photos, and fun text, Lightning Bolt Books™ bring nonfiction topics to life! On the Move presents a rich history of one of the key concepts of modern life: mobility. Increasing mobility has been a constant throughout the modern era, evident in mass car ownership, plane travel, and the rise of the Internet. Typically, people have equated increasing mobility with increasing freedom. However, as Cresswell shows, while mobility has certainly increased in modern times, attempts to control and restrict mobility are just as characteristic of modernity. Through a series of fascinating historical episodes Cresswell shows how mobility and its regulation have been central to the experience of modernity. Based on research by authors at the Sussex Centre for Migration Research. All aboard for a delicious ride on nine legendary railway journeys! Meals associated with train travel have been an important ingredient of railway history for more than a century—from dinners in dining cars to lunches at station buffets and foods purchased from platform vendors. For many travelers, the experience of eating on a railway journey is often a highlight of the trip, a major part of the “romance of the rails.” A delight for rail enthusiasts, foodies, and armchair travelers alike, Food on the Move serves up the culinary history of these famous journeys on five continents, from the earliest days of rail travel to the present. Chapters invite us to table for the haute cuisine of the elegant dining carriages on the Orient Express; the classic American feast of steak-and-eggs on the Santa Fe Super

Chief; and home-cooked regional foods along the Trans-Siberian tracks. We eat our way across Canada's vast interior and Australia's spectacular and colorful Outback; grab an infamous "British railway sandwich" to munch on the Flying Scotsman; snack on spicy samosas on the Darjeeling Himalayan Toy Train; dine at high speed on Japan's bullet train, the Shinkansen; and sip South African wines in a Blue Train—a luxury lounge-car featuring windows of glass fused with gold dust. Written by eight authors who have traveled on those legendary lines, these chapters include recipes from the dining cars and station eateries, taken from historical menus and contributed by contemporary chefs, as well as a bounty of illustrations. A toothsome commingling of dinner triangles and train whistles, this collection is a veritable feast of meals on the move. This volume constitutes the refereed proceedings of the following 9 international workshops: OTM Academy, OTM Industry Case Studies Program, Cloud and Trusted Computing, C&TC, Enterprise Integration, Interoperability, and Networking, EI2N, Industrial and Business Applications of Semantic Web Technologies, INBAST, Information Systems, on Distributed Environment, ISDE, Methods, Evaluation, Tools and Applications for the Creation and Consumption of Structured Data for the e-Society, META4eS, Mobile and Social Computing for collaborative interactions, MSC, and Ontology Content, OnToContent 2014. These workshops were held as associated events at OTM 2014, the federated conferences "On The Move Towards Meaningful Internet Systems and Ubiquitous Computing", in Amantea, Italy, in October 2014. The 56 full papers presented together with 8 short papers, 6 posters and 5 keynotes were carefully reviewed and selected from a total of 96 submissions. The focus of the workshops were on the following subjects models for interoperable infrastructures, applications, privacy and access control, reliability and performance, cloud and configuration management, interoperability in (System-of-)Systems, distributed information systems applications, architecture and process in distributed information system, distributed information system development and operational environment, ontology is use for eSociety, knowledge management and applications for eSociety, social networks and social services, social and mobile intelligence, and multimodal interaction and collaboration. This book discusses migration and space-spanning social network relationships as normal realities of life in African societies. It offers an overview of the research landscape and introduces an agency-centered theoretical model that provides a conceptual framework for translocality. The

authors Malte Steinbrink and Hannah Niedenführ plead for a translocal approach to social transformation, showing how the translocality of livelihoods is shaping the lives of half a billion people on the continent and impacting local conditions. Using an action-oriented approach, the book analyzes the effects of translocal livelihoods on diverse aspects of economic, environmental and social change in rural Sub-Saharan Africa. The study thus makes an innovative contribution not only to migration research and development studies but also to the discussion around the policy and practice of development cooperation and planning. It is time to rethink development in light of translocal realities. The book appeals to scholars and researchers in geography, sociology, policy-making and planning, development studies, migration research and rural development. Ideation. Transition. Execution. These are the three stages of business growth every C-suite leader must navigate throughout the life of their company. Surviving each one is not good enough. You want to thrive, evolve, and, when necessary, transform. But who do you market to? What do you need to operate effectively? When can you scale your business, and in which areas can you grow the most? As the markets change, so will your answers. But these four questions will help you focus on the who, what, when, and where of your business-and they remain the same. In *MOVE*, B2B go-to-market experts Sangram Vajre and Bryan Brown provide you with a four-question framework that will reveal your next steps and propel you forward, no matter the size of your company or the stage you're in. You'll learn how to take your business from ideation to execution and predict your next *MOVE* more confidently. You have the vision, the people, and the plan. Now you have the operating manual. This book is the go-to market blueprint that provides you with the confidence and clarity to get unstuck and level up your organization for long-term success. A Wall Street Journal bestseller: Harness the "power of can't" to make your big, impossible dreams a reality with help from a creative entrepreneur who's turned her quirky passion into a global force. Learn how to make your big, impossible dreams a reality with help from a creative entrepreneur who's turned her passion into a global force. People always ask Shelley Brander what possessed her to leave the successful advertising firm she founded with her husband to open a local yarn store. And then they wonder how that one storefront grew into an e-commerce business, and from there into a global movement to Knit the World Together. In *Move the Needle*, Shelley shares stories from her life to show that you can pursue your life's passions--both personal and professional--no matter how quirky or

impossible they may seem to everyone around you. Whether you are an entrenched or aspiring entrepreneur, or have a passion that just won't let you go, Shelley shares lessons from her journey that reveal how to: Put your passion first and make your creative side hustle your main gig Recognize the true value of creativity and experimentation Have hope against all odds Surround yourself with supportive people Cut ties with those who weigh you down Believe in the power of your weird, impossible dream! In *Move the Needle*, Shelley invites you to embrace your passion and hold space for your seemingly improbable (but totally possible) goals, dreams, and purpose. Based on data from the 1990 National Jewish Population Survey, the authors examine the high level of mobility among American Jews and their increasing dispersion throughout the United States, and how this presents new challenges to the national Jewish community. This book analyses the relation between different discourses and actors through an ethnographic approach, showing not only how fishermen in Slovenia respond to international political economy, how they struggle to survive but also how they generate small changes. Fishing in the northeastern part of the Adriatic Sea makes for a substantial economy anchored in many stories. Regional conflicts, wars, the demise of empires and the rise of nation states with ensuing maritime border issues, socialist heritage, transnational and transformational processes in Europe, and the growth of capitalist relations between production and consumption in coastal areas, have all contributed to the specific discourses that have affected this relatively under-researched area. How this complex, layered and ambiguous quarrelling is constituted at different levels and how this situation is lived and experienced by the local fishermen working along the present Slovene coast effectively forms the core of this book. Describes what is known of the prehistoric ancestor of the elephant and their treacherous journey south for the winter. A touch-and-feel board book featuring vehicles on the go! Little ones will love *ON THE MOVE*, a touch-and-feel book that's filled with vehicles on the go! Babies can touch the silky sail of a boat, the rough dirt in a digger, the shiny rocket, and much more! Filled with familiar objects and bright, friendly artwork, this book is perfect for the youngest of readers.
