The field can be divided into five parts: (1) Information and Methodology for

Financial Analysis; (2) Alternative Finance Theories and Cost of Capital; (3) Capital Budgeting and Leasing Decisions; (4) Corporate Policies and their Interrelationships; (5) Financial Planning and Forecasting. The theories used and discussed in this book can be grouped into the following classical theoretical areas of corporate finance: (1) Pre-M&M Theory, (2) M&M Theory, (3) CAPM, and (4) Option Pricing Theory (OPT). The interrelationships among these theories are carefully analyzed. Real world examples are used to enrich the learning experience; and alternative planning and forecasting models are used to show how the interdisciplinary approach can be used to make meaningful financial-management decisions. In this third edition, we have extensively updated and expanded the topics of financial analysis, planning and forecasting. New chapters were added, and some chapters combined to present a holistic view of the subject and much of the data revised and updated. Pakistan was once only an inspired vision. In 1947, through great sacrifice, a miraculous new nation was born. With its people energised and free, it seemed there was no height Pakistan would not scale. Now, many decades later, as we look back on years of strife, division and poverty cultivated by generations of misguided leaders, we find ourselves wondering how this glorious inheritance became so spoiled. Atif F Qureshi examines the causes of the calamity, in particular the

explanation that trumps all others - the import of Western political, legal and economic systems. Detailing why these methods are wholly unworkable for an independent Muslim nation, he examines how Western concepts such as socialism and English Civil Law have led to crises ranging from economic stagnation to terrorist insurgencies. Yet the decline is not irreversible. Qureshi outlines policies that by returning to core Islamic values will revive, rejuvenate and revitalise this beautiful nation. From defence and the environment to education and banking, every aspect of national planning is explored. He shows how in spite of all the travails, Pakistan is well-placed for a glorious future. After all, a manifest destiny awaits...
