Po' Man's Guide to Keepin Her Happy Nov 13 2019 Po' Man's Guide is a short, humorous look at dating and mating in the free world in a comedic attempt to keep the male out of the doghouse, or at least limit his stay. It's a funny, non politically correct, yet practical and realistic look at the male,

female dynamic and how the male can accept and appreciate all the wonders and mysteries of the female; when she's the most beautiful, understanding, and compassionate person in the world to the most vain, vile, and vengeful creature on earth. It's also a guide for the male navigating the dating world seeking that special female and how he can keep his wits and control his temper when she seems to be losing her mind. In a light hearted and amusing fashion, this book looks at romantic relationship psychology and behavior and how the male can accept some simple premises to win and keep the girl of his dreams while staying true to himself and his values. In the inexplicable, irrational, and illogical world of romantic and sexual attraction, this guide will help both genders, but specifically the male in accepting the psychological and emotional differences and how he can learn to embrace and cherish those differences. And it allows them both to laugh at themselves in a loving way.

**A Practical Guide to Monoclonal Antibodies
Dec 15 2019** Includes all of the information required to produce monoclonal antibodies in the laboratory and to prepare them for use in a multitude of given applications.

Production procedures are treated in chronological order, beginning with basic tissue culture techniques, immunization strategies and screening test design, followed by production of hybridoma cell lines and basic antibody characterization, purification and labeling. Each chapter contains explanatory text on each step with comparative analysis of methods where appropriate. All necessary experimental protocols are presented in a self-contained format that is easy to follow in the laboratory. Alternative protocols are provided where relevant; for others not included in full, source references are presented. Surveys the current status of human hybridoma production and antibody engineering using molecular biology techniques.
