[Something for Daddy Oct 29 2020](#) Bing Bunny is a loveable, feisty new pre-school character, created by Kate Greenaway-shortlisted illustrator Ted Dewan. Bing takes on pre-school challenges such as getting dressed, eating your breakfast and going to the park in his own inimitable style. He is a modern pre-schooler and, in Ted Dewan's exciting new artwork style, has a freshness and friendliness that is both appealing and different from anything else on the market. Bing Bunny: Something for Daddy sees Bing making a picture with lots of sticky goo, colours, sparkly things and paper. Just when things look like they're finally going OK, Bing stops for a snack and puts down his lovely present for a moment. But where is it? What's happened to it? Uh-oh. Making Something for Daddy - it's a Bing thing!

Modeling and Computation in Engineering III Dec 19 2019 The demands of modeling and computation in engineering are rapidly growing as a multidisciplinary area with connections to engineering, mathematics and computer science. **Modeling and Computation in Engineering III** contains 45 technical papers from the 3rd International Conference on Modeling and Computation in Engineering (CMCE 2014, 28-29 June 2014, including 2014 Hydraulic Engineering and Environment Workshop, HEEW 2014). The conference serves as a major forum for researchers, engineers and manufacturers to share recent advances, discuss problems, and identify challenges associated with modeling technology, simulation technology and tools, computation

methods and their engineering applications. The contributions showcase recent developments in the areas of civil engineering, hydraulic engineering, environmental engineering and systems engineering, and other related fields. The contributions in this book mainly focus on advanced theories and technology related to modeling and computation in civil engineering, hydraulic structures, hydropower and management, coastal reclamation and environmental assessment, flood control, irrigation and drainage, water resources and water treatment, environmental management and sustainability, waste management and environmental protection, pollution and control, geology and geography, mechanics in engineering, numerical software and applications. Although these papers represent only modest advances toward modeling and computation problems in engineering, some of the technologies might be key factors in the success of future engineering advances. It is expected that this book will stimulate new ideas, methods and applications in ongoing engineering advances. Modeling and Computation in Engineering III will be invaluable to academics and professionals in civil engineering, hydraulic engineering and environmental engineering.

The Big Bing Nov 29 2020 A corporate mole's-eye view of the society in which we all live and toil, creating one of the most entertaining, thought provoking, and just plain funny bodies of work in contemporary letters. Stanley Bing knows whereof he speaks. He has lived the last two decades working inside a gigantic multinational corporation, kicking and screaming all the way up the ladder. He has seen it all -- mergers, acquisitions, layoffs, the death of the three-martini lunch -- and has himself been painfully re-engineered a number of times. He has eaten and drunk way too much, stayed in hotels far too good for him, waited for limousines in the pouring rain, and enjoyed it all. Sort of. Most importantly, Bing has seen management at its best and worst, and has practiced both as he made the transition from an inexperienced player who hated pompous senior management to a polished strategist who kind of sees its point of view now and then. In one essential volume, here is all you need to know to master your career, your life, and when necessary, other weaker life forms.

Call Me Lucky Dec 11 2021 Reissued to coincide with the paperback publication of the definitive Bing biography by Gary Giddins, here is "a collection of anecdotes and
