Systematic Approach of Characterisation and Behaviour of Recycled Aggregate Concrete Oct 21 2022 This book focuses on the utilisation of construction waste material as coarse aggregate in making concrete. It discusses in detail the behaviour of recycled aggregate under impact load along with other structural applications, and explains the various quality-improvement techniques for recycled aggregate and recycled aggregate concrete (RAC). The first chapter describes the importance of recycling construction and demolition waste and the status quo of global construction and demolition waste recycling. The second chapter examines the recycled aggregate production methodology. Subsequent chapters address the physical and mechanical characteristics and different research findings, as well as the engineering properties of recycled aggregate concrete. Further, the interrelationships among the mechanical properties of recycled aggregate concrete are discussed. The book also explores long-term properties like shrinkage and creep, durability properties, and microstructural characterisation. It will serve as a valuable resource for researchers and professionals alike.

Belgian National Income During the Interwar Period Dec 31 2020 Historical national accounting is nowadays recognized as an important field of research in economic history. Nevertheless the sub discipline also receives a lot of criticism. Several estimates would be based on shaky data material so that the outcome

would in part reflect the personal opinion of those who produced the series. Moreover in some publications the estimation methods are explained in very vague terms thereby making a duplication of the results almost impossible. This book tries to remedy these critiques. The estimation procedures of the various components of Belgian national income between 1920 and 1939 are thoroughly discussed and explained. The book also falsifies the proposition that "Belgium is a country without statistics". There are many series available but they are scattered over many publications and therefore often difficult to find. One merit of this book is that it brings together quantitative material from very diverse sources and origins. Not only economic historians will benefit from the wealth of statistics presented here, but also e.g. social historians.
