In this powerful and culminating work about a group of inner-city children he has known for many years, Jonathan Kozol returns to the scene of his previous prize-winning books, and to the children he has vividly portrayed, to share with us their fascinating journeys and unexpected victories as they grow into adulthood. For nearly fifty years, Jonathan has pricked the conscience of his readers by laying bare the savage inequalities inflicted upon children for no reason but the accident of being born to poverty within a wealthy nation. But never has his intimate acquaintance with his subjects been more apparent, or more stirring, than in *Fire in the Ashes*, as Jonathan tells the stories of young men and women who have come of age in one of the most destitute communities of the United States. Some of them never do recover from the battering they undergo in their early years, but many more battle back with fierce and often jubilant determination to overcome the formidable obstacles they face. As we watch these glorious children grow into the fullness of a healthy and contributive maturity, they ignite a flame of hope, not only for themselves but also for our society. When Jemma, a secretary, first meets Leon Stephanades, her boss's wealthy Greek client, she's unable to take her eyes off him. His smile almost makes her heart burst. Jemma tells herself she mustn't fall for the playboy—he changes lovers as often as her parents and her boss do! In any case, he's a confirmed bachelor who hates being tied down. Nevertheless, aware of Jemma's gaze, Leon tugs her toward him and softly promises, "No conditions, no promises. But while we're together, I'll be yours only." Though annoyed by his arrogance, Jemma is unable to resist his kiss. Thinking Strategically provides the necessary tools for dissecting complex problems and for creating innovative solutions. Douglas Rushkoff was mugged outside his apartment on Christmas Eve, but when he posted a friendly warning on his community website, the responses castigated him for potentially harming the local real-estate market. When did these corporate values overtake civic responsibilities? Rushkoff examines how corporatism has become an intrinsic part of our everyday lives, choices and opinions. He demonstrates how this system created a world where everything can be commodified, where communities have dissolved into consumer groups, where fiction and reality have become fundamentally blurred. And, with this system on the verge of collapse, Rushkoff shows how the simple pleasures that make us human can also point the way to freedom. 'One of the most entertaining and profound philosophical novels ever written' Washington Post On a cold night in Holland two men meet and change each other's lives forever. Max Delius - a hedonistic, yet brilliant astronomer who loves fast cars, nice clothes and beautiful women - picks up Onno Quist, a cerebral chaotic philologist who cannot bear the ordinariness of everyday life. Despite their differences, they fast become great friends. And when they learn they were conceived on the same day, it is clear that their meeting is no coincidence. As the pair fall into and out of love with the same woman - Ada - so their lives become further intertwined. For all three are on a mysterious journey destined to shape human history. The Discovery of Heaven is internationally recognized as a masterpiece. Rich in philosophical, psychological, historical and theological enquiry, it is an extravagant, bold and satisfying novel of ideas. 'Sparkling, irresistible. . . you'll learn a lot from this novel' The Times 'Anyone who reads The Discovery of Heaven will come away enlightened, challenged and entertained' Wall Street Journal 'Written carefully and ingeniously by a novelist who is also a poet' John Updike, New Yorker Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. Focusing on users, consumers and purchasers of technology, this text provides coverage of the essentials for using technology in wired (and wireless) world. It covers the basics, as well as information on building a website, e-commerce, implications of technological advances, buying your first PC, maintaining a computer system, and more. Evolving from the premise that customers have always behaved more like cats than Pavlov's dogs, *Waiting for Your Cat to Bark?* examines how emerging media have undermined the effectiveness of prevailing mass marketing models. At the same time, emerging media have created an unprecedented opportunity for businesses to redefine how they communicate with customers by leveraging the power of increasingly interconnected media channels. Bryan and Jeffrey Eisenberg don't simply explain this shift in paradigm; *Waiting for Your Cat to Bark?* introduces Persuasion Architecture™ as the synthetic model that provides business with a proven context for rethinking customers and retooling marketers in a rewired market. Readers will learn: Why many marketers are unprepared for today's increasingly fragmented, in-control, always-on audience that makes pin-point relevance mandatory How interactivity has changed the nature of marketing by extending its reach into the world of sales, design, merchandizing, and customer relations How Persuasion Architecture™ allows businesses to create powerful, multi-channel persuasive systems that anticipate customer needs How Persuasion Architecture™ allows businesses to measure and optimize the return on investment for every discreet piece of that persuasive system "There's some big thinking going on here-thinking you will need if you want to take your work to the next level. 'Typical, not average' is just one of the ideas inside that will change the way you think about marketing." ?Seth Godin, Author, *All Marketers Are Liars* "Are your clients coming to you armed with more product information than you or your sales team know? You need to read *Waiting for Your Cat to Bark?* to learn how people are buying in the post-Internet age so you can learn how to sell to them." ?Tom Hopkins, Master Sales Trainer and Author, *How to Master the Art of Selling* "These guys really 'get it.' In a world of know-it-all marketing hypesters, these guys realize that it takes work to persuade people who aren't listening. They've connected a lot of the pieces that we all already know-plus a lot that we don't. It's a rare approach that recognizes that the customer is in charge and must be encouraged and engaged on his/her own terms, not the sellers. *Waiting for Your Cat to Bark?* takes apart the persuasion process, breaks down the steps and gives practical ways to tailor your approaches to your varying real customers in the real world. This book is at a high level that marketers better hope their competitors will be too lazy to implement." ?George Silverman, Author, *The Secrets of Word of Mouth Marketing: How to Trigger Exponential Sales Through Runaway Word of Mouth* "We often hear that the current marketing model is broken-meaning the changes in customers, media, distribution, and even the flatness of the world make current practices no longer relevant. Yet few have offered a solution. This book recognizes the new reality in which we operate and provides a path for moving forward. The authors do an outstanding job of using metaphors to help make Persuasion Architecture clear and real-life examples to make it come alive. Finally, someone has offered direction for how to market in this new era where the customer is in control." ?David J. Reibstein, William Stewart Woodside Professor, Wharton Business School of the University of Pennsylvania and former Executive Director, Marketing Science Institute "If you want to learn persistence, get a cat. If you want to learn marketing, get this book. It's purrfect." ?Jeffrey Gitomer, Author, *The Little Red Book of Selling* The book has 120 white pages with dot matrix that will help you while writing and sketching but at the same time gives you enough freedom for notes and other ideas. It comes in handy format 6x9 inches (equivalent to DIN A5). The Nurse Notebook is for those who have a Fable for Medicine or Cure. The Nurse Notebook is versatile, notepad inserts, personal achievements, birthday appointments, your thoughts or other notes of your choice. Use it on holiday as a holiday diary or as a gratitude diary. No matter if motivation, tokens, appointments or notes with this space-saving notebook no wish remains open. For leisure, hobbies or work, this small but fine notebook is always and everywhere suitable for things, ideas or thoughts that want to be noted, e.g. as a thought support or for organizing tasks. Whether for yourself or as a gift for men and women, partners, friends, mums and dads or work colleagues. Especially suitable for birthdays, for Christmas or just as a nice attention for your loved one. A world renowned anthropologist explores the nonverbal signs, signals, and cues human beings exchange to attract and keep their mates. As a medium of communication, Love's silent language predates speech by millions of years. Today, we still express emotions and feelings largely apart from words. The postures, gestures, and facial cues of attraction are universal, in all societies and cultures. According to Dr. Givens, courtship moves slowly through five distinct phases: attracting attention, recognition phase, conversation phase, touching phase, making love. Since potential mates "test" each other before uniting as one, courtship is a choreographed give and take of signs granting physical and emotional closeness. Love Signals is part ethnography and part how-to. Dr. Givens documents the little courting rituals witnessed in elevators, on subways, and in the workplace. He examines the essential role the face plays in courtship and how it can be optimally displayed. He decodes the body to find silent messages given off by shoulders, neck, arms, hands, waist, calves, ankles, feet, and toes. Dr. Givens analyzes expressive shapes, colors, and markings encoded in arm wear, shoulder wear, leg wear, and shoes. He deciphers the background messages of spaces, places and interiors to learn how environs help or hinder in the meeting process. Chemical cues emanating from aromas, tastes, steroids, sterols, and hormones strongly shape a partner's feelings, so they are explored as well. The book suggests ways to gaze, ways to read eyes across a room, and ways to sit, stand, align, walk dress, and lift a drink to participate in the fascinating adventure of finding, winning, and keeping a mate. Knowing the unspoken vocabulary of love signals will give readers an edge. What this means for courtship is that the reader becomes able to read unspoken motives, emotions, and feelings with great clarity and precision. The more readers know about the nonverbal idiom of attraction, the more likely they will find a loving, lasting partner. Groundbreaking and timely, Naturally Selected unravels the mystery of leadership—why some lead, why some follow, and why it matters to every one of us. Evolutionary psychologist Mark van Vugt and science journalist Anjana Ahuja upend the accepted wisdom about leadership and, following in the tradition of Jim Collins' *Good to Great* and Noel Tichy's *The Leadership Engine*, deliver a book with the power to change ordinary lives. Naturally Selected teaches leaders to avoid pitfalls and tells followers how to negotiate the foibles of overbearing managers, giving readers a crucial path to achieving happier lives and greater successes. By New Yorker and Atlantic writer Carl Elliott, a readable and even funny account of the serious business of medicine. A tongue-in-cheek account of the changes that have transformed medicine into big business. Physician and medical ethicist Carl Elliott tracks the new world of commercialized medicine from start to finish, introducing the professional guinea pigs, ghostwriters, thought leaders, drug reps, public relations pros, and even medical ethicists who use medicine for (sometimes huge) financial gain. Along the way, he uncovers the cost to patients lost in a health-care universe centered around consumerism. Explains what humans' interactions with computers teach us about how humans should interact with one another, including the fact that flattery works, mixing criticism with praise is an ineffective method of evaluation and much more. The term "blog" wasn't coined until 1999 and yet by 2004, it had become Merriam-Webster's Word of the Year. Globally, the number of blogs is doubling every six months, with more than 50 million blogs online today. Here to offer a unique overview of the emerging phenomenon that even armchair observers will find curiosity-satisfying is *Dispatches from Blogistan: A Travel Guide for the Modern Blogger*. Filled with practical, easy-to-implement advice for making blogging more enjoyable, useful, and profitable, this book covers everything from blogging and how it fits into the history of journalism to practical tips for planning and managing a blog, attracting and retaining an active readership. Written by noted technology journalist and interactive media veteran Su zanne Stefanac, the book features a fresh and succinct approach; quotes and commentary from noted and celebrity bloggers (author/futurist Bruce Sterling, NPR commentator Farai Chideya, Craig Newmark of craigslist.com, and Cory Doctorow, Boing Boing editor and science fiction author, among others); an accompanying blog site (dispatchesfromblogistan.com); and more. Stefanac explores issues of trust, influence, privacy, discovery, and the power of collaborative discourse, making this is a blog book like no other! Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. From Lewis Black, the uproarious and perpetually apoplectic New York Times-bestselling author and Daily Show regular, comes a ferociously funny book about his least favorite holiday, Christmas. Christmas is supposed to be a time of peace on earth and goodwill toward all. But not for Lewis Black. He says humbug to the Christmas traditions and trappings that make the holiday memorable. In *I'm Dreaming of a Black Christmas*, his hilarious and sharply observed book about the holiday, Lewis lets loose on all things Yule. It's a very personal look at what's wrong with Christmas, seen through the eyes of "the most engagingly pissed-off comedian ever."* From his own Christmas rituals—which have absolutely nothing to do with presents or the Christmas tree or Rudolph—to his own eccentric experiences with the holiday (from a USO Christmas

tour to playing Santa Claus in full regalia), I'm Dreaming of a Black Christmas is classic Lewis Black: funny, razor-sharp, insightful, and honest. You'll never think of Christmas in the same way. *Stephen King Confucius—"Master Kung" (551–479 BCE), the Chinese thinker and social philosopher—originated teachings that have deeply influenced Chinese, Korean, Japanese, and Vietnamese thought and life over many centuries. His philosophy emphasized personal and governmental morality, justice, and appropriateness in social relationships. In time these values gained prominence in China over other doctrines, such as Taoism and even Buddhism. His thoughts later developed into a system of philosophy known as Confucianism. Today there remain many mysteries about the actual circumstances of his life, and the development of his influence has yet to be encapsulated for the general reader. But with Michael Nylan and Thomas Wilson's Lives of Confucius, many mysteries are laid to rest about his historical life, and fascinating details emerge about how his mythic stature evolved over time, right up to the present day. Why are one in three American adults pervasively dissatisfied with their lives? Why is major depression seven times more likely among those born after 1970 than their grandparents? Why are one in four of us addicted to at least one substance or behavior? Why is America drowning in record personal and public debt? Why did over 100,000 people humiliate themselves this year auditioning for Fox's American Idol? Why are 80 percent of women unhappy with their bodies? What is it about contemporary America that connects the swelling incidence of depression, behavioral addictions, eating disorders, debt, materialism, sleep deprivation, family breakdown, rudeness, fame fixation, ethical collapse, mistrust, and monstrous acts of personal violence? Drawing from emerging science in several fields and insights about our transformed social lives, Rubens explains how genes, commercial culture, and global hyper-competition have locked tens of millions of Americans into an unwinnable success benchmarks race and unleashed an epidemic of status defeat. OverSuccess shows how and why the resulting social and psychological pathologies are different for baby boomers, men, and women. Offering hope for our future, Rubens outlines 20 ways that individuals, businesses, and voluntary organizations can satisfy the American drive for recognition and personal achievement without the toxic burdens of OverSuccess. These cures range from holding the door for strangers and somatic cell gene therapy, to responsible displays of wealth and building village-scale social and business organizations. The recent announcement that Google would digitize the holdings of several major libraries sent shock waves through the book industry and academe. Google presented this digital repository as a first step towards a long - dreamed - of universal library, but skeptics were quick to raise a number of concerns about the potential for copyright infrin... In this smart, engaging book, Lee Eisenberg, best-selling author of The Number: A Completely Different Way to Think about the Rest of Your Life, leads us on a provocative and entertaining tour of America's love/hate affair with shopping, a pursuit that, even in hard times, remains a true national pastime. Why do we shop and buy the way we do? In a work that will explain much about the American character, Eisenberg chronicles the dynamics of selling and buying from almost every angle. Neither a cheerleader for consumption nor an anti-consumerist scold, he explores with boundless curiosity the vast machinery aimed at inducing us to purchase everything from hair mousse to a little black dress. He leads us, with understated humor, into the broad universe of marketing, retailing, advertising, and consumer and scientific research--an arsenal of powerful forces that combine to form what he calls "The Sell Side." Through the rest of the book, Eisenberg leads us through the "Buy Side" -- a journey directly into our own hearts and minds, asking among other questions: What are we really looking for when we buy? Why are we alternately excited, guilt-ridden, satisfied, disappointed, and recklessly impulsive? What are our biases, need for status, impulses to self-express, that lead us individually to buy what we buy? Are you a classic buyer (your head wants to do the right thing), or a romantic buyer (your heart just wants to have fun)? How do men and women differ in their attitudes towards shopping, and does the old cliché -- "Women shop, men buy" -- apply any longer? Of special interest are the author's findings on the subject of What Makes a Good Buy? We all purchase things that we sooner or later regret, but what are the guidelines for making purchases that we'll never regret? What, for instance, defines the perfect gift? Brimming with wit and surprise, Shoptimism will be delightful and instructive reading for anyone with a credit card and a healthy curiosity about American culture, through good times and bad. For here, in one vivid journey, is a memorable, panoramic portrait of our everyday self-delusions, desires, and dreams. Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. From one of our most acclaimed novelists, a David-and-Goliath biography for the digital age. One night in the late 1930s, in a bar on the Illinois-Iowa border, John Vincent Atanasoff, a professor of physics at Iowa State University, after a frustrating day performing tedious mathematical calculations in his lab, hit on the idea that the binary number system and electronic switches, combined with an array of capacitors on a moving drum to serve as memory, could yield a computing machine that would make his life and the lives of other similarly burdened scientists easier. Then he went back and built the machine. It worked. The whole world changed. Why don't we know the name of John Atanasoff as well as we know those of Alan Turing and John von Neumann? Because he never patented the device, and because the developers of the far-better-known ENIAC almost certainly stole critical ideas from him. But in 1973 a court declared that the patent on that Sperry Rand device was invalid, opening the intellectual property gates to the computer revolution. Jane Smiley tells the quintessentially American story of the child of immigrants John Atanasoff with technical clarity and narrative drive, making the race to develop digital computing as gripping as a real-life techno-thriller. Open and closed -- Unlimited capacity -- The algorithm -- Moon shot -- Gootube -- Small world, after all -- A personal matter -- Algorithm, meet humanity. After an eclipse of some 50 years, Number Theory, that is to say the study of the properties of the integers, has regained in France a vitality worthy of its distinguished past. More 'and more researchers have been attracted by problems which, though it is possible to express in simple statements, whose solutions require all their ingenuity and talent. In so doing, their work enriches the whole of mathematics with new and fertile methods. To be in a position to tackle these problems, it is neces sary to be familiar with many specific aspects of number theory. These are very different from those encountered in analysis or geometry. The necessary know-how can only be acquired by study ing and solving numerous problems. Now it is very easy to form ulate problems whose solutions, while sometimes obvious, more often go beyond current methods. Moreover, there is no doubt that, even more than in other disciplines, in mathematics one must have exercises available whose solutions are accessible. This is the objective realised by this work. It is the collab orative work of several successful young number theorists. They have drawn these exercises from their own work, from the work of their associated research groups as well as from published work. Networks rule the world. Take any organization: a corner shop, a new venture, a gang of drug traffickers, the United Nations, Google, the place you work. They are all networks, with their own rules and values and ways of communicating. Everybody belongs to networks and they make a huge difference to our lives - to our happiness and to our opportunities. SUPERCONNECT looks at how the successful and fortunate few behave - and shows that if you want to be one of them, you have to play by the network rules. Acquaintances, friends of friends, distant neighbours, random encounters - all can put us in touch with new, different worlds that bring big breaks or surprising sources of happiness. We are becoming more and more connected - via the web, mobile phone technology and global media. How does this affect us? And how can we make the most of these connections? Discover how African-American professionals can combine their personal strengths with the wisdom of others to plant the seeds of a positive, lasting legacy in the workplace. Randal Pinkett was the first African-American winner on The Apprentice. When he won, he also became the only contestant to be asked to share his victory with a white woman. For generations, African-Americans have been told that they need to work twice as hard as everyone else to succeed. However, as millions of black Americans were reminded by Pinkett's experience, sometimes hard work is not enough. Black Faces in White Places is about "the game", the competitive world in which we all live and work. The book offers 10 revolutionary strategies for playing, mastering, and changing the game for the current generation, while undertaking a wholesale redefinition of the rules for those who will follow. In this book, you will: Expand yourself beyond your comfort zone Recognize and demonstrate the four facets of excellence Build beneficial relationships and powerful networks Identify different mentors and learn from others' experiences Discover ways of working with others to facilitate collective action Based on the authors' considerable experiences in business, in the public eye, and in the minority, the book shows how African-American professionals can (and must) think and act both entrepreneurially and "intrapreneurially". Black Faces in White Places not only explains shattering the old "glass ceiling" and changing the concept of success, but also examines the four dimensions of the contemporary black experience: identity, society, meritocracy, and opportunity. http://www.worldscientific.com/worldscibooks/10.1142/1046 This simple, patient, and complete guide to the iPad shows readers, step-by-step, how to do what they want to do right away, like surf the Internet, send email, listen to music, take notes, read ebooks, and play with photos. Having your own blog isn't just for the nerdy anymore. Today, it seems everyone—from multinational corporations to a neighbor up the street—has a blog. They all have one, in part, because the folks at WordPress make it easy to get one. but to actually build a good blog—to create a blog people want to read—takes thought, planning, and some effort. From picking a theme and using tags to choosing widgets and building a community, creating your blog really starts after you set it up. In this book by blogger extraordinaire Scott McNulty, you learn how to: Install and get your WordPress blog running. Set up your site to ensure it can easily grow with you and your readers. Be the master of user accounts. Manage your site with the WordPress Dashboard and extend its capabilities with plug-ins. Make the most of images. Work with pages, templates, and links and—of course—publish your posts. Deal with comments—if you even want readers commenting at all. Find a theme—or build one yourself. Maintain your site and fix common problems. When the World Calls is the first complete and balanced look at the Peace Corps's first fifty years. Revelatory and candid, journalist Stanley Meisler's engaging narrative exposes Washington infighting, presidential influence, and the Volunteers' unique struggles abroad. He deftly unpacks the complicated history with sharp analysis and memorable anecdotes, taking readers on a global trek starting with the historic first contingent of Volunteers to Ghana on August 30, 1961. In the years since, in spite of setbacks, the ethos of the Peace Corps has endured, largely due to the perseverance of the 200,000 Volunteers themselves, whose shared commitment to effect positive global change has been a constant in one of our most complex—and valued—institutions. Among its many amazing applications, Google now has web-based alternatives to many of the applications in Microsoft Office. This comprehensive and easy-to-follow new book enables you to explore Google's new office applications in detail. Once you do, you'll be in good company -- more than 100,000 small businesses and some corporations are already looking to take advantage of these free Google offerings. Google Apps: The Missing Manual teaches you how to use three relatively new applications from Google: "Docs and Spreadsheets", which provide many of the same core tools that you find in Word and Excel; and Google Calendar and Gmail, the applications that offer an alternative to Outlook. This book demonstrates how these applications together can ease your ability to collaborate with others, and allow you access to your documents, mail and appointments from any computer at any location. Of course, as remarkable as these applications are, Google's office suite is definitely a work-in-progress. Navigating what you can and can't do and -- more importantly -- understanding how to do it isn't always easy. And good luck finding enough help online. Google Apps: The Missing Manual is the one book you need to get the most out of this increasingly useful part of the Google empire. This book: Explains how to create, save and share each of Google's web-based office applications Offers separate sections for Docs and Spreadsheets, Google Calendar, and Gmail Demonstrates how to use these applications in conjunction with one another Gives you crystal-clear and jargon-free explanations that will satisfy users of all technical levels Many of you already use Gmail, but do you know its full potential? Do you know how you can increase its power by using Gmail with Doc and Spreadsheets and Google Calendar? You'll find out with Google Apps: The Missing Manual. You'll also come to understand why large corporations such as General Electric and Proctor & Gamble are taking a long, hard look at these applications. This is a story of how miracles DO happen. How courage and a never-give-up spirit can emerge victorious. How an engaging little monkey helped change a family's life. Ellen Rogers considered herself something of a tragedy snob. The single mother of five believed she could weather any storm, that she could keep her family from harm with fortitude and grace. But nothing could have prepared her for the June 2005 car accident that left her son, Ned--then 22 years old--fighting for his life. Ellen refused to give in to despair. We'll get through this, she told herself. We have to. But love and determination can only go so far, and the road home was fraught with obstacles. Ellen and Ned took comfort in family and friends. And they prayed for a miracle. Miracles happen to those who believe, the saying goes, but who would have believed that one family's "miracle" would weigh in at five pounds sopping wet? Then Helping Hands: Monkey Helpers for the Disabled provided Ned with an affectionate and intelligent service animal with a steadfast devotion to hierarchy, a longing for "spa days," and a craving for Gummi Bears. In other words, a diva. Life with Kasey was yet another challenge for this large and lively family, but they persevered as families do, and in time this wise and sensitive animal did more than help Ned cope with his disabilities--she turned the simple tasks of life into a life worth living. Kasey's astonishing intelligence and compassion brought hope and laughter back to a family facing its greatest challenge, and helped them see the world in a new way. WHY DO YOU BELIEVE THE THINGS YOU BELIEVE? Do you remember events differently from how they really happened? Where do your superstitions come from? How do morals evolve? Why are some people religious and others nonreligious? Everyone has thoughts and questions like these, and now Andrew Newberg and Mark Waldman expose, for the first time, how our complex views emerge from the neural activities of the brain. Bridging science, psychology, and religion, they demonstrate, in simple terminology, how the brain perceives reality and transforms it into an extraordinary range of personal, ethical, and creative premises that we use to build meaning, value, spirituality, and truth into our lives. When you come to understand this remarkable process, it will change forever the way you look at the world and yourself. Supported by groundbreaking research, including brain scans of people as they pray, meditate, and even speak in tongues, Newberg and Waldman propose a new model for how deep convictions emerge and influence our lives. You will even glimpse how the mind of an atheist works when contemplating God.Using personal stories, moral paradoxes, and optical illusions, the authors demonstrate how our brains construct our fondest assumptions about reality, offering recommendations for exercising your most important muscle in order to develop a more life-affirming, flexible range of attitudes. You'll discover how to: Recognize when your beliefs are altered by others Guard against mental traps and prejudicial thinking Distinguish between destructive and constructive beliefs Cultivate spiritual and ethical ideals Ultimately, we must always return to our beliefs. From the ordinary to the extraordinary, they give meaning to the mysteries of life, providing us with our individual uniqueness and the ability to fill our lives with joy. Most important, though, they give us inspiration and hope, beacons to guide us through the light and dark corners of the soul
