Agriculture Handbook Jan 08 2022 Set includes revised editions of some issues.

Multiple Dwelling and Tourism Nov 25 2020 The movement of people, goods, capital and information is a central aspect of living in the inter-connected, globalised late-modern world. Although this broader view of mobility is recognized, this book focuses mainly on migration or the movement of people and examines multiple dwelling as a societal response to the major influences of increased mobility and amenity tourism (visiting or residing in high quality landscapes such as mountains, beaches and forests for leisure experiences). It considers the modern-day meaning of multiple dwelling, how it affects personal identity and the meaning of 'home' and its impacts on host communities and landscapes. This book is of significant interest to those working in the areas of tourism, leisure, geography, outdoor recreation, sociology and anthropology.

Terrestrial Vegetation of California, 3rd Edition Jul 14 2022 "This completely new edition of Terrestrial Vegetation of California clearly documents the extraordinary complexity and richness of the plant communities and of the state and the forces that shape them. This volume is a storehouse of information of value to anyone concerned with meeting the challenge of understanding, managing or conserving these unique plant communities under the growing threats of climate change, biological invasions and development."—Harold Mooney, Professor of Environmental Biology, Stanford University "The plants of California are under threat like never before. Traditional pressures of development and invasive species have been joined by a newly-recognized threat: human-caused climate change. It is essential that we thoroughly understand current plant community dynamics in order to have a hope of conserving them. This book represents an important, well-timed advance in knowledge of the vegetation of this diverse state and is an essential resource for professionals, students, and the general public alike."—Brent Mishler, Director of the University & Jepson Herbaria and Professor of Integrative Biology, University of California, Berkeley
