In the late '70s and early to mid 1980s, San Francisco was a creative incubator, bringing forth all manner of new music acts. Ground zero for the scene was the Mabuhay Gardens, home to huge barrels of popcorn, once-a-week spaghetti nights, colorful emcee Dirk Dirksen, and punk/new wave bands from all over the Bay Area. Concert booker and renegade radio deejay Howie Klein joined with Aquarius Records owner (and fellow deejay) Chris Knab to launch a record label in support of that scene. *Disturbing the Peace: 415 Records and the Rise of New Wave* is Bill Kopp's chronicle of the groundbreaking independent record label founded by Howie Klein & Chris Knab, featuring the stories of Romeo Void, Red Rockers, Translator, Wire Train, Roky Erickson, The Nuns, Pearl Harbor and Explosions, and nearly two dozen other bands. Based on nearly 100 interviews with the artists, industry execs, producers, friends, rivals, onlookers, journalists and hangers-on, *Disturbing the Peace* also features hundreds of photos and memorabilia from the personal archives of those who were there. *Blank Complaints Register Log*

This manual contains guidance on food safety standards for the catering industry, developed by the Scottish HACCP Working Group of the Scottish Food Enforcement Liaison Committee on behalf of the Food Standards Agency Scotland. "These original documents are crucial for understanding East Asian Buddhist development. Professor Broughton's analysis of the material provides a new and refreshing look at the tradition which was focused on meditation and the ancient lineage of Bodhidharma. . . . We can be grateful that the translations are accompanied by a detailed study that gives the reader access to the social and cultural events of the time."–Lewis Lancaster, University of California, Berkeley The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya, the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya. This book trains the next generation of scientists representing different disciplines to leverage the data generated during routine patient care. It formulates a more complete lexicon of evidence-based recommendations and support shared, ethical decision making by doctors with their patients. Diagnostic and therapeutic technologies continue to evolve rapidly, and both individual practitioners and clinical

teams face increasingly complex ethical decisions. Unfortunately, the current state of medical knowledge does not provide the guidance to make the majority of clinical decisions on the basis of evidence. The present research infrastructure is inefficient and frequently produces unreliable results that cannot be replicated. Even randomized controlled trials (RCTs), the traditional gold standards of the research reliability hierarchy, are not without limitations. They can be costly, labor intensive, and slow, and can return results that are seldom generalizable to every patient population. Furthermore, many pertinent but unresolved clinical and medical systems issues do not seem to have attracted the interest of the research enterprise, which has come to focus instead on cellular and molecular investigations and single-agent (e.g., a drug or device) effects. For clinicians, the end result is a bit of a "data desert" when it comes to making decisions. The new research infrastructure proposed in this book will help the medical profession to make ethically sound and well informed decisions for their patients.
