The first photographic exploration from a Westerner living and travelling in North Korea for two years. What happens when you travel to a place where even basic truths are ambiguous? Where sometimes you can't trust your own eyes or feelings? Where the divide between real and imagined is never clear? For two years, Lindsey Miller lived in North Korea, long regarded as one of the most closed societies on earth. As one of Pyongyang's small community of resident foreigners, Lindsey was granted remarkable freedoms to experience the country without government minders. She had a front row seat as North Korea shot into the headlines during an unprecedented period of military tension with the US and the subsequent historic Singapore Summit. However, it was the connection with individuals and their families, and the day-to-day reality of control and repression, that delivered the real revelations of North Korean life, and which left Lindsey utterly changed from the woman who had nervously disembarked from her plane onto an empty runway just two years before. This is her extraordinary photographic account, a testament to the hidden humanity of North Korea. Stylish reissue of the Orange Prize Winning Novel. "How should we live in this house of God? We know that the way a building is shaped also helps in determining the way those within it live and relate. We are indeed formed by what we form. Qualities such as integrity, hospitality, humanity and beauty in a place will enable its dwellers to live lives in which such qualities are evident. The way we understand who we are and how we live will be reflected in our places and vice versa. Our places become bearers of meaning and memory." —From Chapter 1 In Living in the House of God, Margaret Malone draws on her study of and research on the Rule of Saint Benedict to show the ways in which this ancient rule can illuminate modern life. The broad gamut of topics this book examines—from Benedictine life as sacrament to Augustine's influence on Benedict to obedience and the art of listening, among others—is itself a witness to the generous flexibility of the Rule, as Benedict proposes a way of life that truly corresponds to the deepest needs of the whole of human nature. In 1961, John F. Kennedy referred to the Papuans as "living, as it were, in the Stone Age." For the most part, politicians and scholars have since learned not to call people "primitive," but when it comes to the Papuans, the Stone-Age stain persists and for decades has been used to justify denying their basic rights. Why has this fantasy held such a tight grip on the imagination of journalists, policy-makers, and the public at large? Living in the Stone Age answers this question by following the adventures of officials sent to the New Guinea highlands in the 1930s to establish a foothold for Dutch colonialism. These officials became deeply dependent on the good graces of their would-be Papuan subjects, who were their hosts, guides, and, in some cases, friends. Danilyn Rutherford shows how, to preserve their sense of racial superiority, these officials imagined that they were traveling in the Stone Age—a parallel reality where their own impotence was a reasonable response to otherworldly conditions rather than a sign of ignorance or weakness. Thus, Rutherford shows, was born a colonialist ideology. Living in the Stone Age is a call to write the history of colonialism differently, as a tale of weakness not strength. It will change the way readers think about cultural contact, colonial fantasies of domination, and the role of anthropology in the postcolonial world. This compulsively readable novel recreates a lost time, when the future was more important than the past and anything seemed possible. This American classic has been corrected from the original manuscripts and indexed, featuring historic photographs and an extensive biographical afterword. Dramatic social and economic change during the middle ages altered the lives of the people of Britain in far-reaching ways, from the structure of their families to the ways they made their livings. In this masterly book, preeminent medieval historian Christopher Dyer presents a fresh view of the British economy from the ninth to the sixteenth century and a vivid new

account of medieval life. He begins his volume with the formation of towns and villages in the ninth and tenth centuries and ends with the inflation, population rise, and colonial expansion of the sixteenth century. This is a book about ideas and attitudes as well as the material world, and Dyer shows how people regarded the economy and responded to economic change. He examines the growth of towns, the clearing of lands, the Great Famine, the Black Death, and the upheavals of the fifteenth century through the eyes of those who experienced them. He also explores the dilemmas and decisions of those who were making a living in a changing world—from peasants, artisans, and wage earners to barons and monks. Drawing on archaeological and landscape evidence along with more conventional archives and records, the author offers here an engaging survey of British medieval economic history unrivaled in breadth and clarity. Includes an author biography, chapter summaries, discussion questions, reproducibles, and cross-curricular activities for students of all learning styles for George's novel, *My Side of the Mountain*. Suitable for both adults and children to read, this 1938 novel shows five children successfully looking after themselves when their parents go away and fail to return. Dominic West (from the Foreword) As lockdown has caused us all to reevaluate our lives, becoming more self-reliant and living in closer harmony with nature have emerged as important priorities. Many of us have decided to up sticks and leave the city behind for a less frenetic existence in the country. Whether you've already made the move, or are dreaming of doing so one day, this is the book for you. Covering bee-keeping, poultry rearing, pig farming, bread baking, wood-chopping, fire-laying, bartering and much more, *How to Live in the Country* is the perfect source of inspiration for old hands and beginners alike: useful, informative but also refreshingly honest and realistic. Tom Hodgkinson draws on the wisdom of an eclectic range of thinkers and writers as he guides us through each month of the year, giving lists of tasks for both garden and animal husbandry, offering tips and short-cuts, and weaving in stories about his own experience of raising a young family in rural Devon. In *The House I Live In*, award-winning historian Robert J. Norrell offers a truly masterful chronicle of American race relations over the last one hundred and fifty years. This scrupulously fair and insightful narrative--the most ambitious and wide-ranging history of its kind--sheds new light on the ideologies, from white supremacy to black nationalism, that have shaped race relations since the Civil War. For, Norrell argues, it is ideology, more than politics or economics, that has powerfully sculpted the landscape of race in America. Beginning with Reconstruction, Norrell shows how the democratic values of liberty and equality were infused with new meaning by Abraham Lincoln, yet soon became meaningless for generations of African Americans, as white supremacy drove a wedge between the races. Indeed, the heart of this book paints a vivid portrait of the long, dangerous struggle of African Americans to defeat this pernicious mode of thought. Along the way, Norrell offers fresh and at times controversial appraisals of figures such as Booker T. Washington, W.E.B. Du Bois, and Martin Luther King, Jr., and dissects the ideas of racists such as novelist Thomas Dixon. Most important, he offers striking new insights into black-white history, observing for instance that the Civil Rights movement really began as early as the 1930s, and that contrary to much recent writing, the Cold War was a setback rather than a boost to the quest for racial justice. He also breaks new ground on the role of popular culture and mass media in first promoting, but later helping defeat, notions of white supremacy. Though the struggle for equality is far from over, Norrell writes that today we are closer than ever to fulfilling the promise of our democratic values, a promise first made by Lincoln at the battlefield of Gettysburg. * Bruce Springsteen, legendary rock 'n' roll star, live on stage!* Photos by Janet Macoska, whose work has appeared in Rolling Stone, Creem, Mojo, NY Times and at The Rock and Roll Hall of Fame* Springsteen and the E Street Band in glorious black and white and color photos, including iconic, rare, unseen and contact sheets* Photographs cover multiple performances over five decadesFive decades of blue-jeans, down-to-earth rock 'n' roll. Five decades of poetic, authentic performances, political commentary, global tours and even a Broadway show. Bruce Springsteen hasn't just left an impact on the surface of modern music, he helped shape its foundations. From the early beginnings in 1974 to the seminal *Born in the USA* - one of the best-selling albums of all time - to the 2016 River Tour, the highest grossing tour of the year, Springsteen has a truly timeless appeal, captured here by lauded rock photographer, Janet Macoska. Macoska charts Springsteen through the ages. Through her lens we witness his enduring energy on the stage, from 1974 to 2016. Here is Springsteen at his finest: a down-to-earth superstar, whose powerful performances stand the test of time. "Bruce would rip his heart out and give it to his audience. He put everything into his performance. He was all over the stage, and the whole rest of the band was in lockstep, complimenting that energy. It was going out to the audience in bundles. We were sending it back, too, and that's really electric. That energy, those visuals? Photographers love that. It's perfect to have something like that to photograph." - Janet Macoska Reimagining the scholarly book as living and collaborative--not as commodified and essentialized, but in all its dynamic materiality. In this book, Janneke Adema proposes that we reimagine the scholarly book as a living and collaborative project--not as linear, bound, and fixed, but as fluid, remixed, and liquid, a space for experimentation. She presents a series of cutting-edge experiments in arts and humanities book publishing, showcasing the radical new forms that book-based scholarly work might take in the digital age. Adema's proposed alternative futures for the scholarly book go beyond such print-based assumptions as fixity, stability, the single author, originality, and copyright, reaching instead for a dynamic and emergent materiality. Adema suggests ways to unbind the book, describing experiments in scholarly book publishing with new forms of anonymous collaborative authorship, radical open access publishing, and processual, living, and remixed publications, among other practices. She doesn't cast digital as the solution and print as the problem; the problem in scholarly publishing, she argues, is not print itself, but the way print has been commodified and essentialized. Adema explores alternative, more ethical models of authorship; constructs an alternative genealogy of openness; and examines opportunities for intervention in current cultures of knowledge production. Finally, asking why it is that we cut and bind our research together at all, she examines two book publishing projects that experiment with remix and reuse and try to rethink and reperform the book-apparatus by taking responsibility for the cuts they make. In the desire and quest to make sense of the world and our existence, three great sirens have lured men and women into a lull with the empty promise to make their lives meaningful. The great king of Israel, Solomon, though the wisest man, was not immune to their song. But at the end of his life, Solomon, in all of his God-given wisdom, stopped to contemplate on all that competed for his attention. He wrote his conclusions in the *Book of Ecclesiastes*. Tommy Nelson continues his study of Solomon's writings by taking an in-depth look at *Ecclesiastes*. In a world such as ours, where the search for meaning and purpose propels mankind to try everything under the sun, Solomon's conclusions ring louder than ever for a people who need answers more than ever. The creeping unease of lives squandered and the bloody glee of lives lost are chillingly captured in these tales of wasted potential and casual cruelty by a master of the short story. Shirley Jackson's *Hangsaman* is a story of lurking disquiet and haunting disorientation, inspired by the real-life, unsolved disappearance of a female college student. 'Shirley Jackson's stories are among the most terrifying ever written' Donna Tartt, author of *The Goldfinch* Natalie Waite, daughter of a mediocre writer and a neurotic housewife, is increasingly unsure of her place in the world. In the midst of adolescence she senses a creeping darkness in her life, which will spread among nightmarish parties, poisonous college cliques and the manipulations of the intellectual men who surround her, as her identity gradually crumbles. This edition includes a Foreword by Francine Prose. Shirley Jackson's chilling tales have the power to unsettle and terrify unlike any other. She was born in California in 1916. When her short story *The Lottery* was first published in *The New Yorker* in 1948, readers were so horrified they sent her hate mail; it has since become one of the greatest American stories of all time. Her first novel, *The Road Through the Wall*, was published in the same year and was followed by five more: *Hangsaman*, *The Bird's Nest*, *The Sundial*, *The Haunting of Hill House* and *We Have Always Lived in the Castle*, widely seen as her masterpiece. Shirley Jackson died in her sleep at the age of 48. 'An amazing writer' Neil Gaiman 'The world of Shirley Jackson is eerie and unforgettable ... It is a place where things are not what they seem; even on a morning that is sunny and clear there is always the threat of darkness looming, of things taking a turn for the worse' A. M. Homes 'Shirley Jackson is unparalleled as a leader in the field of beautifully written, quiet, cumulative shudders' Dorothy Parker

volume Joyce Carol Oates, our leading practitioner of the contemporary Gothic, presents the essential works of Shirley Jackson, the novels and stories that, from the early 1940s through the mid-1960s, wittily remade the genre of psychological horror for an alienated, postwar America. She opens with *The Lottery* (1949), Jackson's only collection of short fiction, whose disquieting title story—one of the most widely anthologized tales of the 20th century—has entered American folklore. Also among these early works are "The Daemon Lover," a story Oates praises as "deeper, more mysterious, and more disturbing than 'The Lottery,'" and "Charles," the hilarious sketch that launched Jackson's secondary career as a domestic humorist. Here too are Jackson's masterly short novels: *The Haunting of Hill House* (1959), the tale of an achingly empathetic young woman chosen by a haunted house to be its new tenant, and *We Have Always Lived in the Castle* (1962), the unrepentant confessions of Miss Merricat Blackwood, a cunning adolescent who has gone to quite unusual lengths to preserve her ideal of family happiness. Rounding out the volume are 21 other stories and sketches that showcase Jackson in all her many modes, and the essay "Biography of a Story," Jackson's acidly funny account of the public reception of "The Lottery," which provoked more mail from readers of *The New Yorker* than any contribution before or since.

You'll be spellbound' Brian Cox This is a story about you. It is the history of who you are and how you came to be. It is unique to you, as it is to each of the 100 billion modern humans who have ever drawn breath. But it is also our collective story, because in every one of our genomes we each carry the history of our species - births, deaths, disease, war, famine, migration and a lot of sex. In this captivating journey through the expanding landscape of genetics, Adam Rutherford reveals what our genes now tell us about human history, and what history can now tell us about our genes. From Neanderthals to murder, from redheads to race, dead kings to plague, evolution to epigenetics, this is a demystifying and illuminating new portrait of who we are and how we came to be. *** 'A thoroughly entertaining history of Homo sapiens and its DNA in a manner that displays popular science writing at its best' Observer 'Magisterial, informative and delightful' Peter Frankopan 'An extraordinary adventure...From the Neanderthals to the Vikings, from the Queen of Sheba to Richard III, Rutherford goes in search of our ancestors, tracing the genetic clues deep into the past' Alice Roberts
